Re: Cain Creek Mine's Conceptual Water Control Plan, Moab Salt, M/019/006, Grand  
County, Utah

Dear Mr. Mize:

In going over our permitting review's, we find that Moab Salt Inc.'s large mine permit application still has an outstanding stipulation attached. The stipulation required our approval of the operator's Conceptual Water Control Plan and an implementation schedule for the finalized Control Plan.

We are still seeking the Division of Water Quality's (DWQ) assistance in helping resolve this outstanding issue. A letter was forwarded to you on October 7, 1993 (copy attached) requesting whether or not the Conceptual Plan had been finalized between Moab Salt and DWQ. If not, could this Division be of any assistance in working out a final resolution. To date, we have not heard from your office regarding this issue.

Thank you for your time and consideration in helping resolve the long overdue concern regarding this issue. Please contact me directly if I can answer any questions you may have in this regard. Holland Shepherd has left our office for a position in New Mexico.

Sincerely,

D. Wayne Hedberg  
Permit Supervisor  
Minerals Regulatory Program
